DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-7, 9-17, 19-26 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Claim 1 contains the limitation "isolating a portion of the response signal between a time of flight signal and the reflected signal". There is no discussion in the specification to "isolate" such a signal.

Claims 4 and 10 contains the limitation, adjusting the temporal maximum length of the MLS signal based on the analyzed correlation. There is no discussion in the specification as to adjusting a MLS signal based on the analyzed correlation.

3. The office contacted the applicants' representative, 17 May 2005, to ask for clarification of support in the specification for the claimed as stated above (see interview summary). The office is awaiting a supplemental amendment upon which an office action will be issued in due course.
